## I. Introduction

PROMISE—Promoting Readiness of Minors in Supplemental Security Income (SSI)—was a joint initiative of the U.S. Department of Education, the Social Security Administration (SSA), the U.S. Department of Health and Human Services, and the U.S. Department of Labor to address critical issues related to supporting youth with disabilities by funding and evaluating programs designed to promote positive change in the lives of youth who were receiving SSI and their families. Under cooperative agreements with the U.S. Department of Education, six entities across 11 states implemented model demonstration projects in which they enrolled SSI youth ages 14 through 16 . The programs intended to (1) provide educational, vocational, and other services to youth and (2) make better use of existing resources by improving service coordination between state and local agencies. The Social Security Administration contracted with Mathematica to conduct the national evaluation of how the programs were implemented and operated, their impacts on SSI payments and education and on employment outcomes for youth and their families, and their net benefits.

This codebook provides documentation for the variables in the PROMISE evaluation's five-year public use file (PUF), which includes a subset of the data collected and analyzed for the evaluation's five-year impact analysis that assessed whether each PROMISE program improved the outcomes of the youth and families who were offered PROMISE services as of five years after they enrolled in the program. The PUF contains data from the evaluation's five-year follow-up surveys of youth and parent or guardian enrollees. It also contains select data from the PROMISE random assignment (RA) system, as well as a few variables constructed from the survey, RA system, and SSA administrative data.

The next section of this codebook provides the name, label, universe, position, type, and format for all variables; mean, standard deviation, and minimum and maximum values for numeric variables; and category labels, frequency counts, and frequency percentages for categorical variables. A user guide for the PUF accompanies this codebook as a separate volume.

Users interested in obtaining data from the PROMISE evaluation's 18-month follow-up surveys of youth and parent enrollees may consult the separate 18-month PUF, which has its own user guide and codebook. The two PUFs can be linked using PUF ID (variable pufid). For additional data collected and analyzed for the evaluation, users may request the 18-month and five-year restricted access files from SSA.

| Number of Non-Missing Observations: | 11634 |
| Number of Missing Observations: | 950 |
| Construction Specification: | Sum of all parents' SSI payments in the fourth year after RA. For the public use file, coded the top $0.5 \%$ of non-zero and non-missing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, coded the bottom $0.5 \%$ of non-zero and nonmissing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, and rounded all other values as follows: rounded values between $\$ 0.01$ and $\$ 999.99$ to the nearest $\$ 10$; rounded values between $\$ 1,000.00$ and $\$ 49,999.99$ to the nearest $\$ 100$; and rounded values of $\$ 50,000$ or higher to the nearest $\$ 1,000$. |
| User Note: | This variable reflects SSI payment receipt in the fourth year following the month of RA (for example, for a parent of a youth randomly assigned in April 2015, the fourth year after RA is May 2018 through April 2019). The PROMISE impact analysis used winsorization to recode outliers and inflationadjusted OASDI and SSI benefits to 2020 dollars. This variable includes winsorized and inflation-adjusted values. Values are missing if no parents were identified in the SSA administrative data. |

## R2SP_earn_pastyr_par_puf

Parent's earnings in the year before the five-year survey (PUF) 203

8
NUM
N/A
PROMISE five-year parent survey
All randomly assigned cases
12584
8383
4201
Amount of earnings the parent made within the past year at the time of the five-year survey. For the public use file, coded the top $0.5 \%$ of non-zero and non-missing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, coded the bottom $0.5 \%$ of non-zero and non-missing values in each program (calculated as the percentage of all values) to the programspecific mean of those values, and rounded all other values as follows: rounded values between $\$ 0.01$ and $\$ 999.99$ to the nearest $\$ 10$; rounded values between $\$ 1,000.00$ and $\$ 49,999.99$ to the nearest $\$ 100$; and rounded values of $\$ 50,000$ or higher to the nearest $\$ 1,000$.
This variable was constructed from questions P2_B_B3, P2_B_B3a, P2_B_B4, P2_B_B5, P2_B_B5_Unit, P2_B_B5_hrsthing, P2_B_B6, P2_B_B6A, and P2_B_B6B in the PROMISE five-year parent survey. The PROMISE impact analysis used winsorization and bottom-coding to recode outliers and multiple imputation to populate missing values. This variable includes winsorized and bottom-coded values but does not include multiply-imputed values.

| Number of Eligible Cases: | 12584 |
| Number of Non-Missing Observations: | s: 7521 |
| Number of Missing Observations: | 5063 |
| Construction Specification: | Sum of all parents' earnings (R2SP_earnings_pastyr) and OASDI and SSI benefits in the year before the five-year survey. For the public use file, coded the top $0.5 \%$ of non-zero and non-missing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, coded the bottom $0.5 \%$ of non-zero and nonmissing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, and rounded all other values as follows: rounded values between $\$ 0.01$ and $\$ 999.99$ to the nearest $\$ 10$; rounded values between $\$ 1,000.00$ and $\$ 49,999.99$ to the nearest $\$ 100$; and rounded values of $\$ 50,000$ or higher to the nearest $\$ 1,000$. |
| User Note: | This variable reflects OASDI and SSI benefit receipt during a one-year period beginning 13 months before the five-year survey and ending 1 month before the survey (for example, for a parent who completed the survey in February 2020, the one-year period is February 2019 through January 2020). The PROMISE impact analysis used winsorization to recode outliers and multiple imputation to populate missing values. This variable includes winsorized values but does not include multiply-imputed values. Values are missing for parents who did not complete the five-year survey and if no parents were identified in the SSA administrative data. |

## Description

R2SP_wkhrs_pastyr_par_puf
Number of hours parent worked per week in the year before the five-year survey (PUF)
209
8
NUM
N/A
PROMISE five-year parent survey
All randomly assigned cases
12584
8955
3629
Number of hours the parent worked per week within the past year at the time of the five-year survey. For the public use file, coded the top $0.5 \%$ of non-zero and non-missing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, coded the bottom $0.5 \%$ of non-zero and non-missing values in each program (calculated as the percentage of all values) to the programspecific mean of those values, and rounded all other values as follows: round values greater than 0 hours and less than 100 hours to the nearest 1 hour and rounded values of 100 hours or more to the nearest 10 hours.
This variable was constructed from questions P2_B_B3 and P2_B_B3A in the PROMISE five-year parent survey. The PROMISE impact analysis used winsorization and bottomcoding to recode outliers and multiple imputation to populate missing values. This variable includes winsorized and bottomcoded values but does not include multiply-imputed values.

Description

## R2SY_income_pastyr_puf

Youth's income from earnings and SSA payments in the year before the five-year survey (PUF) 218 8 NUM N/A

PROMISE five-year youth survey
All randomly assigned cases 125848424 4160
Sum of the youth's earnings (R2SY_earnings_pastyr) and OASDI and SSI benefits in the year before the five-year survey. For the public use file, coded the top $0.5 \%$ of non-zero and non-missing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, coded the bottom $0.5 \%$ of non-zero and nonmissing values in each program (calculated as the percentage of all values) to the program-specific mean of those values, and rounded all other values as follows: rounded values between $\$ 0.01$ and $\$ 999.99$ to the nearest $\$ 10$; rounded values between $\$ 1,000.00$ and $\$ 49,999.99$ to the nearest $\$ 100$; and rounded values of $\$ 50,000$ or higher to the nearest $\$ 1,000$. This variable reflects OASDI and SSI benefit receipt during a one-year period beginning 13 months before the five-year survey and ending 1 month before the survey (for example, for a youth who completed the survey in February 2020, the one-year period is February 2019 through January 2020). The PROMISE impact analysis used winsorization to recode outliers and multiple imputation to populate missing values. This variable includes winsorized values but does not include multiply-imputed values.
